

Mattress Bag Filler

FinCorp Engineering produces a wide variety of *mattress* processing equipment. Among them is the Mattress Filling Machine machine.

This machine is used to Fill Foam mattresses into pre-sewn covers. The machine can be adapted to various sizes in seconds, thus the operator can run any size mattress at any time. The machine is equipped with two-foot switches so the

operator can run the machine forward or reverse in case of a miss-fill.

The heavy-duty grip belts insure a slip free and smooth filling of all densities.

Mattress size changes can be done on the fly with simple lever and push button controls.

General Specifications

- Complete package unit.
- Mattress capacity 50-160 cm wide, 8 to 25 cm thick
- Speed capacity up to 5 mattresses per min.
- 3 conveyor motors synchronized speed.
- Electrical forward and reverse foot switches
- Adjustable side pressure conveyors with grip type belt.
- Electrically adjustable mattress width settings.
- Mattress thickness setting adjustment.
- Assembled and ready for shipment.
- Overall Dimensions: 2240 x 1200 x 3300 mm Weight: 600 Kg.
- Power requirement: 380 V. 50 Hz. 3 Ph. 8 Amp.
