## Tufting Press

The Tufting Press Machine from **FinCorp Engineering** is a versatile machine used in the *Tufting* of Spring, Foam, Cotton, or Synthetic fiber filled mattresses.

A variety of buttons, knobs, or cotton balls can be attached via hoop strings. Designed to easily compress today's high spring count quality mattresses containing hi density fillings. With it's massive 4000 Kgs compression power, the Tufting Press will compress hand stitched pocket spring mattresses which have up to 400 mm deep borders.

Pivots within its own area for safety

Can accommodate deep mattresses
